

The Landlord Game

2 – 6 players

any

2 – 5 minutes

* More Blinks, more challenging, more fun!

Objective

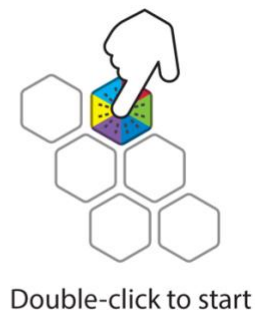

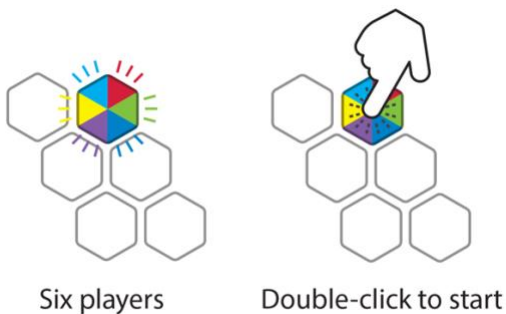

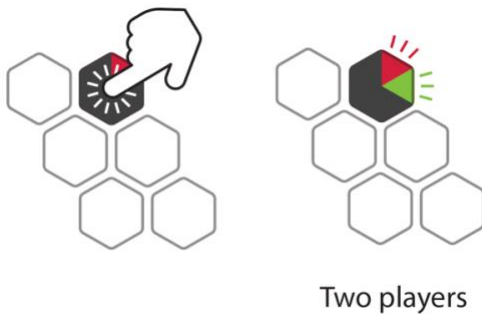

Concentrate on the houses available for sale and buy the most houses to become the richest tycoon in the town.

Setup

To begin, connect all Blinks in any arrangement to create a new “town.”

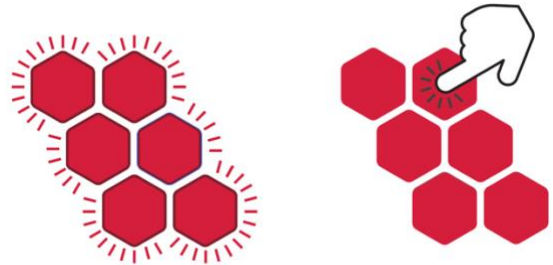

Click on any blink to set the number of players.

Different colors on the faces of the blink represent different players and their assigned colors. Double-click on the Blink to start the game.

Gameplay

Each player is a “landlord” who wants to buy houses in the town. Each Blink is a “house” that is on sale. In each round, all the landlords have a chance to buy a house by clicking on a Blink. It is your turn when all Blinks turn to your color.

Note that you can't buy houses from other landlords. Once the house is bought, it's permanently owned by the landlord. The Blink turns white to denote that the house is already sold. The transaction will only be made successfully when the house doesn't have an owner.

Win condition

All Blinks turn white when all the houses are sold. Houses owned by you will be painted in your color. Then, the map of the town is displayed. The landlord with the most houses in the town is the winner. Your goal is to always keep track of the unselected Blinks and to successfully buy a new house in each round. To restart the game, double-click any Blink.
